Smart Contract & Back-End Blockchain Developer — 2+ years shipping production DeFi protocols, ICO platforms, and Web3 DApps across Ethereum, Polygon, and Avalanche. MSc in Blockchain Technology (MIT-WPU). Open to full-stack Web3 roles; strongest interest in smart contract engineering, back-end protocol design, and on-chain architecture.

EDUCATION

MIT World Peace University , <i>MSc in Blockchain Technology</i> Pune, India	CGPA: 7.8 / 10	2024
Marathwada Mitramandal College , <i>BSc in Computer Science</i> Pune, India	CGPA: 7.5 / 10	2022

MSc Courses: Smart Contracts | Distributed Ledger Technology | Cryptography | Consensus Algorithms | DeFi Protocols | Hyperledger Fabric

BSc Courses: Data Structures & Algorithms | Database Management | Software Engineering | Web Technologies | Network Security | Object-Oriented Programming

EXPERIENCE

Freelance, *Full Stack Blockchain Developer* | Remote Jun 2025 - Current

- Delivered **5+ end-to-end ICO platforms** and **NFT systems** for luxury-goods clients, owning the full stack from **Solidity contracts** (Hardhat) to **MERN** front-ends and admin dashboards.
- Integrated **Stripe** fiat-to-crypto payment rails into production blockchain applications, enabling seamless on-ramp flows for non-crypto-native users.
- Architected **meta-transaction relayer** infrastructure to abstract gas fees from end users, improving DApp UX across **cross-chain** deployments.

TecMetaverse, *Full Stack Blockchain Developer* | Pune, India (company wound down) Nov 2024 - Jun 2025

- Engineered the **Chainsphere ICO platform** — a multi-phase token launch system managing a **5.31B token supply** with automated vesting schedules, referral trees, KYC integration, and real-time analytics.
- Shipped production **DeFi staking and yield-farming contracts** across **Polygon, Ethereum, and Avalanche**, integrating liquidity mining mechanisms into full-stack MERN applications.
- Built **serverless API layer** on **AWS Lambda** with IAM-secured **Node.js / Express** microservices, supporting scalable back-end operations for Web3 DApps with **Layer 2** scaling.
- Mentored **4 interns** in Solidity, Web3.js, and React, accelerating their onboarding to production-grade blockchain development workflows.

Portalwiz Technologies, *Software Developer Intern* | Pune, India (concurrent with MSc) Feb 2024 - Aug 2024

- Built and deployed a **production chatbot** (Django + React) serving as a 24/7 tech-support assistant for a live client website, reducing repetitive support load.
- Developed **3–4 client chatbot integrations** with **MongoDB** back-ends, delivering automation solutions that streamlined customer communication workflows.

Alpha Analytics Services, *Software Intern* | Pune, India (concurrent with MSc) Jan 2023 - Dec 2023

- Built and shipped multiple **full-stack MERN applications** from scratch, owning front-end (React), API layer (Node.js / Express), and database (MongoDB) end-to-end.
- Improved application reliability through systematic **debugging, testing, and performance optimization**, collaborating in an Agile team environment.

SKILLS

Languages	Solidity, JavaScript, TypeScript, Go (REST APIs), Python (Basic), C
Blockchain	Ethereum, Polygon, Avalanche, Smart Contracts, ERC-20, ERC-721, ERC-1155, DeFi, Staking, Tokenomics
Protocols & Infra	Substrate, Hyperledger Fabric, Merkle Trees, Consensus Algorithms, Circom (learning), Halo2 (learning)
Blockchain Tools	Hardhat, Ethers.js, Web3.js, IPFS, Alchemy, Slither, MetaMask, WalletConnect, OpenZeppelin
Web & Back-End	Node.js, Express.js, React.js, Next.js, Django, REST APIs, Microservices, PrismaDB, MongoDB, PostgreSQL
Cloud & DevOps	AWS Lambda, AWS S3, AWS EC2, AWS IAM, Docker, Git, CI/CD

PROJECTS

Chainsphere ICO Platform – Enterprise Token Launch System 2025

- Architected end-to-end **tokenomics system** managing a **5.31B token supply** across multi-phase presale rounds with on-chain **automated vesting** and **smart contract**-enforced round transitions.
- Built scalable **Express.js microservices** backend with **PrismaDB**, featuring role-based access control, referral trees, and real-time sales analytics.
- Delivered enterprise **admin dashboard** with full **sale lifecycle management**, **KYC integration**, and **wallet connectivity** (MetaMask / WalletConnect).

Enhanced zkSNARK-based Transaction System (Work In Progress) 2024 - Present

- Migrating **Circom ZK circuits** to **Halo2** to eliminate trusted setup requirements; targeting **60% reduction** in proof generation overhead via batch transaction processing.
- Built a **Substrate-based blockchain runtime** with a custom **pallet-zksnark** that handles on-chain proof verification for private transactions.
- Designing **Merkle tree validation circuits** and automated **build.rs** workflows to improve transaction scalability and developer experience.

Certificates

- Certified Smart Contract Developer | Blockchain Council | 2024
- Certified Blockchain Developer | Blockchain Council | 2024
- Certified Hyperledger Developer | Blockchain Council | 2023
- JavaScript Algorithms and Data Structures | FreeCodeCamp | 2023
- Responsive Web Design | FreeCodeCamp | 2023
- Applied Scrum for Agile Project Management | edX University System of Maryland | 2023
- Google Cloud Computing Foundation Course | Allison | 2022

Interests

- | | |
|--------------|---|
| Powerlifting | Dedicated to building strength and discipline through consistent training sessions. |
| Treks | Exploring nature and tackling challenging mountain trails on weekends for adventure. |
| Trading | Analyzing financial markets and cryptocurrency trends to make informed investment decisions. |
| Motorcycles | Passionate about bike rides and understanding motorcycle mechanics and maintenance. |
| Coding | Creating innovative software solutions and exploring new programming technologies in free time. |
